Turn instinct into **output.**
Make the strange thing
usable.

METHOD

cinematic direction + technical architecture + fast iteration

MATERIAL

AI video, 3D worlds, games, audio-reactive systems, agent workflows

STANDARD

less generic, more buildable, more emotionally precise

Current catalogue

FOUR ACTIVE FORMATS
CREATIVE TECHNOLOGY · 2026

AI FILM PRODUCTION

Cinematic prompt systems, character continuity, shot design, edit-aware workflows, and full fantasy film production pipelines.

For directors, agencies, studios, and teams that need visual output before the old pipeline catches up.

MODE Cinematic
STACK AI Video
OUTPUT Shots / Decks / Systems

GAME WORLDS

Capyverse-style playable IP: cute but action-heavy, stylized but not kiddy, built around characters, mechanics, and trailer-ready moments.

Player fantasy first. Production reality second. Steam-ready shape, not vague lore.

MODE Playable
ENGINE Unreal / 3D
OUTPUT Loops / Levels / IP

SLOPIA TOOLS

AI-native creation platform thinking: 3D scenes, characters, video generation, creator workflows, and internet-native franchises.

Not “AI content.” Worlds that can keep producing media, stories, assets, and social signals.

MODE Platform
CORE World → Video
OUTPUT MVP / Pitch / UX

AGENCY OPS

AI services that make money now: campaign concepts, visual systems, rapid decks, content engines, and production workflows for clients.

Taste-preserving monetization. Practical offers without turning the work into generic SaaS soup.

MODE Revenue
CLIENT Agency / Brand
OUTPUT Offers / Assets / Systems

Creative tech, but with taste sharp enough to survive the machine.
